MEMORANDUM FOR: Executive Director-Comptroller

SUBJECT : Consultant Report on Agency Procurement

REFERENCE : Your memorandum to DD/I,
dated 7 Oct 66, same subject

1. My comments on the recommendations contained
in the study of Agency procurement systems by [redacted]
follow:

a. Special Assistant to the DDS for
Agency Procurement

I endorse the idea of assigning responsibility to one individual for the development and establishment of uniform Agency procurement policies and procedures and the general monitoring of Agency procurement. Such a position could be logically under the DDS or the DDS & T since a split procurement system is recommended.

b. Contract Review Board

The establishment of such a Board appears to me to be unnecessary. Certainly the individual designated above could review contracts of the stipulated level, calling for such information and technical advice as required without the formality of a board.

c. Production and Logistics Procurement

Concur

d. Inventory Management

Concur

e. Centralization of R & D Procurement
Under DDS & T

With the understanding that centralization of R & D procurement does not include centralization of the management and technical control of all R & D programs we can endorse this recommendation. In the case of NPIC we must continue with the responsibility for the development, approval and technical monitoring of R & D programs devoted to imagery exploitation and associated matters. We certainly have no objection to the consolidation of those administrative functions related to contract procurement negotiation and fiscal monitoring.

f. Centralization of Contract Auditing

I defer to the comments of the Inspector General.

g. Procurement Management Information
System

Concur. Such a system is very much needed.

h. Revolving Stock Fund

The present PRA system has been a source of confusion and annoyance for some time. I favor a system like the Revolving Stock Fund or the Informal Stock Fund which would provide for control by components including the prerogative of reprogramming the funds as required.

i. Security Practices in R & D Contracting

Concur. Unrealistic procedures and inconsistencies have been causing problems for contract monitors.

~~SECRET~~

~~SECRET~~

Approved For Release 2004/07/08 : CIA-RDP80B01676R001600240003-8

j. Integration of NPIC Equipment Systems

The consultant's point is well taken. NPIC will continue to develop an integration system concept internally which will be mission-oriented and will hopefully accomplish total integration of the major contractual categories. Contractual assistance will be sought as required.

k. Management of NPIC Long Range Program

NPIC is well aware of the need for continuing attention and development of its long range R & D program. It has taken a number of steps over the past year to assure this. We are then in accord with the general thrust of the recommendation.

MEMORANDUM FOR : Executive Director-Comptroller

SUBJECT : DDP Comment on "Consultant Report on Agency Procurement"

REFERENCE : Executive Director-Comptroller Memo, dated 7 October 1966; Same Subject

1. This memorandum contains my general comments on the Consultant Report on Agency Procurement. I will briefly touch on one or two points of major concern to the Clandestine Services. The attached annex contains detailed and more extensive comment on all of the findings and recommendations in the report that affect the Clandestine Services.

2. As noted in the I.G.'s forwarding memorandum with the report, the greatest organizational innovation proposed is the centralization of all the Agency's R&D and related production procurement under the Science and Technology Directorate. This recommendation vitally affects our activities in the Clandestine Services, since TSD (and to a lesser extent, several other Clandestine Services components) carries out an extensive and varied R&D and related production activity of central importance to Clandestine Services operations. Although I feel that the Clandestine Services can live with the proposed reorganization, I am not sure it represents the most effective way of managing our procurement activities. In a practical sense, the proposed reorganization represents little change over our present mode of operation, since the report suggests the assignment of a procurement officer from the Science and Technology Directorate to TSD with real authority to contract, in recognition of the special nature of scope of TSD contracting activities. This is almost identical to the present arrangement, under which such an officer is assigned to TSD from the Office of Logistics. Under the proposed new arrangement, should the assigned contracting officer be given greater independence of action and more final contract-negotiating authority, it might actually improve our present situation.

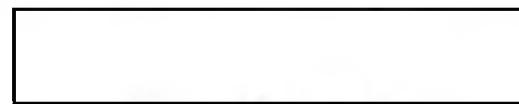

3. This recommendation of the Consultants derives from their perceptive observation that R&D procurement is fragmented in the Agency at present, but that those units which handle their own R&D procurement achieve better overall results in terms of general management of these activities. I agree with these observations, but it seems to me that they point the way to a different and more effective R&D procurement system than that suggested by the Consultants. I think the Agency R&D procurement system should be decentralized to allow those directorates having an R&D mission to conduct their own contracting, following common procedures and policy considerations. The Consultant-recommended Special Assistant for Procurement in the Support Directorate could well become such a source for central policy and procedural guidance in R&D and related production procurement, with each directorate having a contracting group operating in the closest touch with the individual directorate's differing and special needs, in closest proximity to its technical officers and activities.

4. There is nothing in this suggestion which is incompatible with the recommended Management Information System for Procurement. In this area, for a variety of reasons, I favor a separate Management Information System for the Clandestine Services, but one which is compatible with the other system or systems in the Agency for the purpose of supplying central R&D and production management information. We are working on such a system now.

5. My more detailed analysis on the report, as it affects Clandestine Services operations, follows in the attachment. My comments are keyed to the Consultants' summary of recommendations in Chapter VI, and will include references to other sections of the report which are of interest to the Clandestine Services.

6. In summary, although I do not completely agree with all of the recommendations of the report, I found the report to be constructive, stimulating, useful and provocative. If there has been any general error in the Consultants' recommendations, it is a tendency to sacrifice

some responsiveness to the peculiar and individual needs of the Clandestine Services for the sake of organizational and bureaucratic tidiness. However, the Consultants' report affords an excellent base from which to proceed with a long needed arrangement of our R&D and related production procurement activity.

MEMORANDUM FOR: Executive Director-Comptroller

THROUGH : Director, Planning, Programming and Budgeting
SUBJECT : Deferral of Procurement Actions
REFERENCE :

25X1

1. This memorandum contains a recommendation for your approval; such recommendation is contained in paragraph 4.

2. My recommendations with regard to the handling of the more significant procurement actions of the Support Directorate are detailed in the attached Tabs A through E and summarized as follows:

<u>Tab</u>	<u>Component</u>	<u>Defer Indefinitely or Eliminate</u>	<u>Defer Obligation thru Jan 67</u>	<u>Obligate as Originally Planned</u>
------------	------------------	--	-------------------------------------	---------------------------------------

25X1

In addition, all the offices of the Support Directorate will give attention to an intensive review of requisitions for administrative or office supplies and equipment.

3. The detail of Tabs A through E is specific enough to permit the authorization of those actions which must go forward and the deferral of those which can be held. A portion of the Tab A is classified as material

25X1

-2-

25X1 and is being forwarded under separate cover. The items listed for indefinite deferral are the construction and equipment of the Office of Communications' [redacted] purchase of firearms for the Office of Security.

25X1

4. I recommend your approval of the actions as proposed in detail in Tabs A through E and summarized in paragraph 2.

NPIC
NP-R-9-10097

Wide Print Straightener

[Redacted]

25X1

25X1

Newly processed photographic prints have a decided curl because of a differential in the drying rates of the emulsion and the paper base. There are commercial print straighteners to deal with this problem, but they will only accept prints up to sixteen inches in width. Recent advances in film resolution and improvements in photographic enlargers have resulted in requirements for a high percentage of prints wider than sixteen inches. This project is to develop a straightener which handles both single and double weight paper prints up to thirty inches wide in about ten seconds.

MEMORANDUM FOR: Executive Director-Comptroller
SUBJECT : Consultant Report on Agency Procurement

1. Attached is a copy of the report and a memorandum providing a brief summary, with our views, of its major points. Distribution of the report is being held subject to your instructions. The consultants are prepared to brief the Director on relatively short notice.
2. As the study was across-the-board its impact will be felt by all the directorates. They will have an active interest in any action deriving from the recommendations, and their reaction to the proposals will make an important contribution to formulating any final course of action.
3. It is suggested that the following steps be taken for acting on the report:
 - a. When instructed, copies of the report will be distributed as follows: three copies each for the Deputy Director for Support and the Deputy Director for Science and Technology; two copies each for the Deputy Director for Plans and the Deputy Director for Intelligence; one copy for the Director of Planning, Programming and Budgeting. The remaining four copies of the total of fifteen printed, one of which is forwarded herewith, will be held for your use and that of this staff.
 - b. Each copy of the report would be accompanied with a copy of the attached memorandum from the Inspector General.
 - c. The general comments of the Deputy Directors and the Director of Planning, Programming and Budgeting will be solicited in addition to which they will be assigned responsibility for commenting specifically on listed recommendations.

11 ..

MEMORANDUM FOR: Deputy Director for Intelligence
Deputy Director for Plans
Deputy Director for Science and Technology
Deputy Director for Support
Director of Planning, Programming and Budgeting

SUBJECT : Consultant Report on Agency Procurement

25X1

1. Copies of the report by the consultant firm [redacted] entitled A Study of the Procurement Systems of the Central Intelligence Agency, are distributed herewith as follows: three copies each to the Deputy Director for Science and Technology and the Deputy Director for Support; two copies each to the Deputy Director for Intelligence and the Deputy Director for Plans; one copy for the Director of Planning, Programming and Budgeting.

25X1

2. The general comments of the addressees are requested, as well as on any specific portion of the report on which they feel comments appropriate. Chapter VI of the report summarizes its major recommendations, as noted in the attached memorandum from the Inspector General in paragraphs 5 through 13. While these recommendations affect the addressees in different degrees, appropriate comments are requested from each of them on these proposals.

3. Additional recommendations are noted below, with a designation of components from which comments are requested specifically. Others may comment as they feel appropriate:

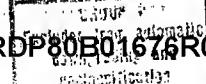

25X1

a. [redacted] in OSA should be rotated (Ch. II, Section 3.4). DDS&T.

b. New Procedures should be instituted for R&D contracting and contractor reporting (Ch. III, Sections 2.7 and 4.3.7). DDS, DDS&T, DDI, DDP.

c. NPIIC should develop a contract for integration of its equipment systems (Ch. III, Section 4.4.7). DDI, DDS, DDS&T.

10-1-12
